Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 17 February 2004.
- 2a) This action is FINAL. 2b) This action is non-final.

DETAILED ACTION

Status of Claims

Claims 1-11 are pending.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Information Disclosure Statement

Receipt of the Information Disclosure Statement filed on 3/15/02 and 2/17/04 respectively is acknowledged. Signed copies of the 1449 is attached herewith.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, page 21, line 1 after formula (5), reference has been made to a substituents which is defined as "wherein doubled-circled Ar,". It is not clear what double-circled Ar applicant is referring to because there is no double-circled structure in claim 11.

Additionally, claims 2 and 3, line 1 in each instance, defines R² on formulae (1) and (2)

without the claim depicting substituent R². The phrase "the coexistence of an acid or an ammonium salt thereof" (claim 7) is indefinite connoting no information as to the presence of an acid or ammonium salt in the reaction medium.

Further, claim 1, line 1, "allowing" connotes the presence of uncertainty. It is suggested to change the word to ---reacting---.

Priority

Applicant claims priority to JP01/05691, filed on 07/02/01. The translated version of this document has not been provided. The rejection below is applicable because the reference has different inventive entity and published prior to the filing date of this application. Upon receipt of the translated priority document, this rejection will be withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 5-7, 9 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Tokunaga et al., A practical one-pot synthesis of 2,3-disubstituted indoles from unactivated anilines, "Tetrahedron Letters", 42, (2001) pages 3865-3868.

Art Unit: 1626

Applicant claims a process for producing condensed pyrroles of formula (I), which comprises reacting an alkyne alcohol of formula (4) with an aromatic primary amine in the presence of a ruthenium complex.

Tokunaga et al., disclosed the preparation of 2-substituted-3-methyl indoles from anilines with propargyl alcohols in the presence of ruthenium. See the entire reference, especially page 3866, Scheme I.
